FEATURES

- High quality LED's means low power consumption
- Brytec lenses are all manufactured from Polycarbonate which is considerably more durable than acrylic
- Greater impact/chip resistance
- High quality resin pods to better adapt to temperature change
- All lamps come standard with tin coated cable and stainless steel fittings
- Available in multi voltage 10-30v
- Unique design of angled LED's to maximise visibility and meet greater safety standards
- Vibration and shock resistant
- Top and bottom water outlet to avoid condensation build up
- Jumbo LED lamps with individual light load resistor
- Truck & Trailer lamps are available in single, double and triple pods with built in reflex reflector
- Separate indicator, stop & reverse lamps include rubber grommet and weather proof plug. Also available with chrome surround. Interchangeable with most leading brands
- Submersible trailer lamps featuring pressure release holes
