## Boosters, Master Vacs & Re-sleeving

Since our humble beginnings as a Reconditioner, ATAP has continued to provide brake and clutch specialists and resellers with quality remanufactured boosters and master vacs and specialized re-sleeving.

With the recent decision of a major competitor to close the doors we have been in the fortunate position of being able to purchase a significant amount of stock.

As a result our work in reconditioning boosters and master vacs and re-

sleeving has increased considerably.

Over the coming months our aim will be to increase capacity and the launch of a new Reconditioned Master Vac Catalogue is not too far away.

Protex reconditioned master vac units comprise the biggest range in Australia and all carry a 12 month/ 20,000 kms warranty. Stock of reconditioned units is carried by all ATAP warehouses

with reconditioning taking place in Melbourne.

For any further information about ATAP's range please contact your local ATAP office.

### Special points of Interest:

- Expanded Protex Range
- New TRW Packaging
- Hydraulic Brake Assembly Fluid

## New TRW Packaging

TRW has unveiled its new packaging design to reflect the move to a single brand. Products will now be branded with just TRW red and white colours and the Lucas name will be phased out.

TRW's new product packaging is an evolution of their previous de-

sign. TRW is now the single name for all of their braking, steering and suspension offerings.

The process of introducing this new packaging will be a rolling change, current stocks will

still be sold in existing packaging.

If you would like to know more about TRW products please contact your local ATAP office.

Part No: 9440

## Protex Hydraulic Brake Assembly Fluid

Hydraulic Brake Assembly fluid should be applied to working components when overhauling wheel cylinders, master cylinders and disc brake calipers.

Apply sparingly to all rubber components, piston surfaces and cylinder

walls to reduce friction and the likelihood of tearing.

Protex Assembly Fluid comes in 8 U.S FL. OZ clear bottle and is made in the USA.

Always remember to avoid contact

with skin and clothes and always wear protective gloves.

Contact your local office to order or for any other information.

### Staff Profile: **RIC GREY**

Ric is the Sales Manager in Victoria. He started with ATAP in 2003 and is always aiming to provide an environment where our sales staff can develop communication and service skills to ultimately result in higher sales. Ric and his wife Chris have two children Arley and Anthony. Outside of work Ric likes eating out, travelling and generally doing outdoor activities.
