

## Protex Brake Discs are recognised as a leading brand in the automotive aftermarket.

An established brand in Australia for over ten years, Protex offers the single largest range of brake and clutch components available in the country today. Formulated to meet the specific quality, fit and performance requirements of modern passenger vehicles, Protex brake discs are available for most cars.

To ensure peace-of-mind for drivers and brake-fitters alike, all Protex brake discs are covered by a **12 month/20,000km Replacement Warranty**.

### Protex STANDARD

Excellent value for money

### Protex GROOVE

Street performance – enhanced efficiency

### Protex ULTRA STREET

Superior performance – maximum efficiency

**PROTEX**  
The standard in auto parts

**Proven under Australian conditions, Protex Brake Discs ensure quality, reliability and exceptional stopping power.**

All Protex brake discs are produced by world class manufacturers. By combining technology and innovation, Protex creates the highest quality auto parts for the widest range of vehicles.

As new technologies develop and variations in vehicle models increase, Protex continues to lead the way through innovation and research.

The standard in auto parts

## Protex Brake Discs

*Premium Braking Performance*

**Protex** is distributed across Australia through an advanced, interlinked warehouse and distributor network. Protex guarantees highest quality service, including specialist online information and technical assistance with the backing of a full nationwide guarantee.

For your nearest Protex reseller please call 03 8369 1300

The Protex range covers over 1400 references with both hat and hub type brake discs available for most vehicles.

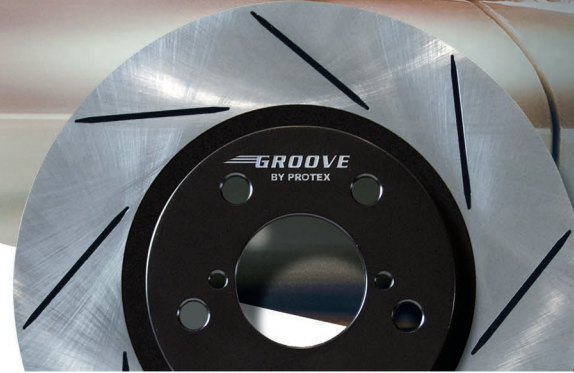

## ULTRA STREET

### PROTEX ULTRA STREET SUPERIOR PERFORMANCE BRAKE DISC

Protex Ultra Street Brake Discs are GROOVED and DRILLED for maximum braking performance. Their unique thermal cooling drill and groove pattern greatly enhance performance by shortening the braking distance and reducing Run Out and DTV.

- Superior strength and life
- Shorter braking distance
- Advanced cooling pillar system
- Precision machined
- Advanced molecular technology
- High Molybdenum composition

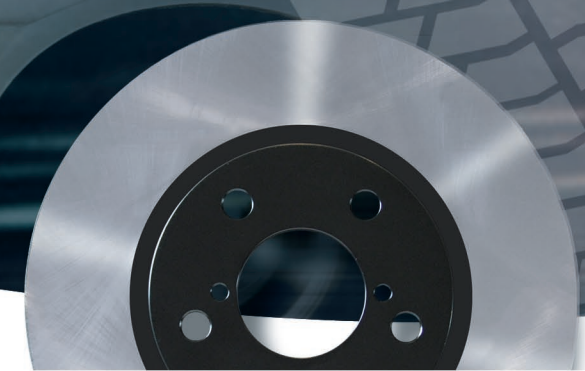

## GROOVE

### PROTEX GROOVE STREET PERFORMANCE BRAKE DISC

Protex Groove Brake Discs are designed for more efficient braking performance. The grooved slots improve performance at high temperatures and shorten the braking distance.

- Increased friction between pad and disc
- Immediate removal of gases, preventing glazing
- Precision machined and ground
- Reduced Run Out and DTV
- Stylish sports appearance
- Acrylic silicone metallic coating

## STANDARD

### PROTEX STANDARD BRAKE DISCS

Protex standard brake discs offer unparalleled range and vehicle coverage. Ground and balanced ensuring maximum bedding in and trouble free operation straight out of the box. Protex brake discs are coated in rust preventative oil.

### PROTEX BRAKE DRUMS

Protex brake drums are available in a wide range of applications to suit all popular drum brake models. From the smaller two door hatch right up to the largest commercial vehicles. There is a Protex brake drum to suit your application.
